CCI Learning Partners with Code Avengers to Bring Coding Curriculum and Resources to the Classroom

Langley, BC – March 9, 2016

CCI Learning has partnered with New Zealand based company, Code Avengers, to bring quality coding curriculum plus teaching resources to enhance teacher's confidence to the classroom. Students across North America now have the opportunity to learn and develop coding skills in HTML, CSS, Javascript, Python, and more.

Code Avengers is an online gamified web and application development curriculum developed by educators that give students a deeper understanding and hands-on approach to coding. Code Avengers strives to develop fun and effective educational experiences for all students from K-12 to Higher Education.

Daniel Bird, VP of Sales at Code Avengers, believes Code Avengers stands out amongst other coding programs because, "Code Avengers was designed by teachers" and has developed a curriculum with the teacher in mind. For teachers with or without coding experience, the Code Avengers curriculum and teaching resources easily integrated into current curriculum to streamline lesson planning.

CCI Learning is extremely excited to be partnering with Code Avengers to help bring coding skills to the North American market. Malcolm Knox, President and CEO of CCI Learning comments, "It is evident that computer science and coding skills are becoming integral to education especially in this evolving digital landscape. Partnering with Code Avengers and providing students the opportunity to gain vital job-ready skills is an effort CCI Learning is proud to be part of."

"We're as equally excited to be partnering with CCI Learning", says Bird on the partnership. "They have great resources and a great commitment to education. Our focus is to make sure we're always partnering with people who want to help students and teachers do the best in learning."

CCI Learning will be offering Code Avengers classroom and school-wide licenses across Canada and in the U.S. in Washington State, Washington D.C., Alaska, and Florida. Class license will be $500 per class (up to 30 students) and school-wide license will be $2,500 per school (up to 200 students). Additional students for school-wide licenses (over 200 students) will be in blocks of 10 for $10 per student.

About Code Avengers

Code Avengers is a New Zealand based coding company founded in November 2011. Code Avengers has reviewed the learning process and has built a proven system to get students the skills and knowledge they need to accomplish their goals. Code Avengers is used to support both instructor-led and self-directed learning in 10,000+ schools, universities, code clubs and businesses.

About CCI Learning

CCI Learning is an Education Technology company specializing in interactive courseware, certification, software licensing, and educator services. CCI Learning distributes the Microsoft Office Specialist, Microsoft Technology Associate, Adobe Certified Associate, Internet and Computing Core Certification (IC3), Autodesk Certified User, and QuickBooks Certified User programs and certifications to Canada and USA as a Certiport Platinum Solution Provider.

CCI Learning is a Microsoft Authorized Education Partner, supporting and advising Microsoft Imagine Academy program members in North America. The award winning, vendor approved content by CCI Learning is researched, created and developed for print, electronic and assessment engines and is sold and distributed globally. This includes approved courseware for Microsoft Office Specialist, Microsoft Technology Associate, Internet and Computing Core Certification (IC3) and QuickBooks.
